## SUMMARY

Computer Engineer and Full-Stack Engineer with hands-on experience designing, developing, deploying, and maintaining production web applications using Django, Django REST Framework, React.js, PostgreSQL, and MySQL.

Experienced in building scalable REST APIs, CMS platforms, authentication systems, and business applications while managing Linux production environments using Ubuntu, Nginx, and Gunicorn.

Strong understanding of software architecture, database design, deployment workflows, application security, and performance optimization across the full software development lifecycle.

## CORE TECHNOLOGIES

Python • Django • Django REST Framework • React.js • JavaScript • PostgreSQL • MySQL • REST APIs • Linux • Ubuntu • Nginx • Gunicorn • Git • GitHub

## SKILLS AND ABILITIES

Backend: Python, Django, Django REST Framework, REST APIs, Authentication & Authorization  
Frontend: React.js, JavaScript, HTML5, CSS3  
Databases: PostgreSQL, MySQL, SQL Query Optimization  
Infrastructure & Deployment: Ubuntu Linux, VPS Management, Nginx, Gunicorn, Domain Management, SSL Configuration  
Development Tools: Git, Github, Postman, VS Code, PyCharm

## PROJECTS

### Recruitment Management Platform

- Designed and developed a full-stack recruitment platform supporting candidate management, customer requests, CV workflows, authentication, and CMS functionality.
- Built scalable REST APIs using Django REST Framework and integrated responsive React.js interfaces.
- Deployed and maintained production environments on Ubuntu using Nginx and Gunicorn.
- Configured domains, SSL certificates, hosting infrastructure, and email services.

### Enterprise CMS Platform

- Developed a scalable content management system for managing dynamic pages, services, forms, and business content.
- Implemented modular architecture and role-based access control.
- Designed backend services, optimized databases, and maintained production deployment.

## EXPERIENCE

**Flint Consulting (Client: Azem Multiple Sclerosis Association) – Hail, Saudi Arabia** Jul 2025 – Present

### Computer Engineer – Full Stack Developer & IT Administrator

- Developed and maintained production-ready web applications using Django, Django REST Framework, and React.js.
- Designed scalable REST APIs and optimized relational database structures using PostgreSQL and MySQL.
- Managed Ubuntu production servers, Nginx, Gunicorn, hosting environments, domains, SSL certificates, and email systems.
- Collaborated with business stakeholders to analyze requirements and deliver software solutions that improved operational workflows.
- Administered Active Directory, user permissions, and internal IT infrastructure while supporting daily technical operations.
- Implemented backup and recovery procedures to improve business continuity and system reliability.

**Emara Hail – Hail, Saudi Arabia** Jan 2024 – Jul 2024

### Computer Engineer Intern

- Developed a real-time data acquisition system with an interactive user interface.
- Assisted in software and hardware troubleshooting.
- Collaborated with engineers to document technical procedures and improve workflow efficiency.

**Gloria Jean's coffee – Hail, Saudi Arabia** Oct 2021 – Oct 2023

### Data Entry Specialist

- Maintained high data accuracy through structured validation processes.
- Produced operational reports using Microsoft Excel and Google Sheets.

## EDUCATION

**Bachelor's: computer engineering** Jan 2019 – Aug 2024

University of Hail – Hail, Saudi Arabia

## COURSE & CERTIFICATIONS

**AWS Certified Cloud Practitioner** – Learning Path, Saudi Digital Academy | 2026

**Django Web Applications** — Tuwaiq Academy (60 Hours)

**React.js Interactive Web Development** — Tuwaiq Academy (45 Hours)

**Operating Systems Basics** — Cisco Networking Academy

**AI & Digital Content Management Workshop**
