SUMMARY

Computer Engineer and Full-Stack Engineer with hands-on experience building scalable web applications using Django, Django REST Framework, React.js, and SQL databases.

Experienced in designing **REST APIs**, authentication systems, CMS platforms, and deploying production-ready applications on **Linux VPS** environments using Nginx and Gunicorn.

Strong background in backend architecture, database optimization, deployment workflows, and maintaining secure, high-performance production environments.

SKILLS AND ABILITIES

Backend

- Python
- Django
- Django REST Framework
- REST APIs
- Authentication & Authorization

Frontend

- React.js
- JavaScript
- HTML/CSS

Database

- PostgreSQL
- MySQL
- SQL Query Optimization

Deployment & Infrastructure

- Linux (Ubuntu)
- VPS Management
- Nginx
- Gunicorn
- Domain & SSL Configuration

Tools

- Git & GitHub
- Postman
- VS Code / PyCharm

PROJECTS

Recruitment Management Platform

- Built a full-stack recruitment management platform with candidate and CV management workflows
- Designed scalable REST APIs and authentication systems
- Implemented dynamic filtering and CMS functionality
- Managed production deployment on Linux VPS using Nginx and Gunicorn
- Configured hosting, domains, SSL certificates, and email systems

Operations & Management Systems

- Developed internal management systems to automate operational workflows
- Designed responsive frontend interfaces using React.js
- Built backend services and database structures using Django
- Optimized database performance and deployment reliability

EXPERIENCE

Gloria Jean's coffee – Hail, Saudi Arabia

Data Entry Specialist

- Maintained high data accuracy and reporting consistency
- Utilized Excel and Google Sheets for operational reporting

Oct 2021 – Oct 2023

Emara Hail – Hail, Saudi Arabia

Computer Engineer Intern

- Developed a real-time data acquisition system with interactive UI/UX
- Assisted in troubleshooting hardware and software issues
- Documented technical workflows and system procedures

Jan 2024 – Jul 2024

Azem Multiple Sclerosis Association – Hail, Saudi Arabia

Computer Engineer – Full Stack Developer & IT Administrator

- Developed and maintained full-stack web applications using Django and React.js
- Designed scalable backend APIs and database structures
- Designed and optimized PostgreSQL/MySQL database structures and queries
- Managed production Linux VPS environments, domains, hosting infrastructure, and email systems
- Configured deployment workflows using Nginx and Gunicorn
- Implemented backup and recovery procedures to improve system reliability
- Maintained secure production environments and system performance

Jul 2025 – Present

EDUCATION

Bachelor's: computer engineering

University of Hail – Hail, Saudi Arabia

Jan 2019 – Aug 2024

COURSE & CERTIFICATIONS

Django Web Applications – Tuwaiq Academy (2025)

Developing integrated web applications using Django with Tuwaiq Academy (60 hours).

React.js Interactive Web Development – Tuwaiq Academy (2025)

Building dynamic interactive websites using React Js with Tuwaiq Academy (45 hours).

AI & Digital Content Management Workshop – Hail, Saudi Arabia (2023)

Workshop and training course in AI and Digital content management.

Operating Systems Basics – cisco (2024)

learned the basics of computer and mobile devices operating systems (12 hours).
